

# HVAC - Senior Project Engineer

- Major Commercial Projects
- Based in Perth, Western Australia
- Opportunity to Join a Progressive Company

**West Australian Mechanical Services is a wholly owned and operated WA company, we are an Industry leader in providing mechanical services as a total package including support solutions to the commercial and industrial construction sectors . Our business model is based on repeat business and this is supported by the growth we have been able to achieve across all of our business divisions.**

To drive the success and profitability of many of these projects, we require a "Senior Project Engineer" to join our Team. Your responsibilities will include but not limited to the complete delivery of the engineering aspects of our projects, with emphasis on compliance and quality. Your major projects experience and previous exposure to large scale HVAC projects will allow you to comfortably handle this role.

You are a degree qualified Mechanical Engineer or equivalent Diploma. Your high level of experience in delivering multi-million dollar projects will allow you to work independently, and your detailed knowledge of a range of commercial HVAC systems will make you adaptable to any project type. You will have the opportunity to be involved in some of WA landmark and well-known projects.

To be successful in your application for this role you must possess:

- Degree or Diploma Qualified.
- Evidence of project management and design of HVAC projects over \$5 million.
- Enthusiasm and a 'can do' attitude.
- Excellent communication skills.

Relocation expenses will be considered for successful applicants, along with a generous remuneration package along with a fully maintained Company car and all other items needed to carry out your role will be supplied. If you are looking to join a successful and continually expanding business that values their people, provides good career opportunities, we would like to meet you.
